ABOUT ME

My goal is to effectively apply my communication, teamwork, and problem-solving skills, gained through my education and professional experience, in a corporate environment. With a human-centered and innovative mindset, I aim to contribute to your company's projects while continuously improving myself. As a professional who is always open to learning, providing innovative solutions to digital transformation processes through my software development expertise is a key source of motivation for me. I strive to turn challenges into opportunities by leveraging my advanced technical knowledge.

PROJECTS

İstanbulApp
.NET MAUI (MVVM, XAML, Shell Navigation, Dependency Injection) · REST API · SQLite
Cross-platform city guide app for Istanbul: places, routes, favorites, culture and transportation info, backed by REST API integration with local data caching.

HalıSahaApp
.NET MAUI (MVVM, Shell) · ASP.NET Core Web API · EF Core · SQL Server · JWT
Mobile app for creating five-a-side football matches, joining via invite codes, team management, match results and statistics.

FlightBooking
ASP.NET Core (.NET 9) · MongoDB · AutoMapper · FluentValidation · Microsoft ML.NET
Flight booking platform with an admin panel and machine-learning-powered features.

RestoranProject
ASP.NET Core (.NET 10) · Razor Pages · EF Core · SQL Server · SignalR · ASP.NET Core Identity
QR-based restaurant ordering and table management system: customers order via table-specific QR codes while staff manage a live table map, manual order entry, split-bill payments, and sales reports in real time.
